DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to method of manufacturing an absorbent and time release material, classified in class 264, subclass 118.
 - II. Claims 11-16, drawn to an absorbent and time release material, classified in class 502, subclass 400.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as one where the pulp is not formed into a block but rather a sheet.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Richard Bauer on March 20, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Priority

5. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Canada on 15 October 1998. It is noted, however, that applicant has not filed a certified copy of the 2,250,339 application as required by 35 U.S.C. 119(b).
